Overview

Motivation

The motivation behind this project is to provide an efficient and user-friendly futsal ground booking system. Currently, many futsal players struggle with unorganized booking methods, lack of availability tracking, and payment issues. This system aims to streamline the booking process and enhance user convenience.

Target Customers

Casual futsal players looking for quick and hassle-free ground reservations.
Ground owners seeking a better management system.
Tournament organizers who require a structured booking system.

Project Deliverables

This project will deliver a fully functional application that allows users to book futsal grounds in real-time, manage their profiles, make payments, and receive notifications. It will also provide an admin dashboard for ground owners and administrators.

Project Timeline

The development of the project is expected to take 3 months, covering planning, development, testing, and deployment phases.

Dependencies

This project does not depend on any existing software but can integrate with payment gateways and social media platforms for authentication.

Project Detail

2.1 Project Goals

Functional Goals

- User registration and login (Email)
- Profile management (Edit name, phone, preferences)
- Role-based access (Users, Admins, Ground Owners)
- Real-time futsal ground booking system
- Payment integration (Online payments, cash on arrival)
- Admin dashboard for ground owners and admins
- Reviews and ratings system
- Push notifications and reminders

Technological Goals

Use modern web development frameworks (HTML, CSS, JavaScript, Node.js with PHP, MySQL)
Ensure high system availability and real-time data updates
Secure authentication and payment handling

Quality Goals

User-friendly and responsive UI
Secure transactions and user data protection
Scalability to support multiple futsal grounds

Constraints

Must comply with data protection and payment security standards.

2.2 Project Scope

Included Features

User registration and authentication
Futsal ground listing
Booking management system
Payment gateway integration
Admin and ground owner dashboard
Ratings and review system
Push notifications and reminders

Excluded Features

AI-based matchmaking for teams

2.3 Project Team

Name	Availability	Comment
Aneeq	Full-time	Backend, Database Manager
Hamza	Full-time	Frontend Developer

2.4 Existing Work

Some futsal booking apps do exist, but they lack real-time availability tracking, integrated payments, and a dedicated admin panel for ground owners. Our system differentiates itself by focusing specifically on futsal, providing a seamless experience for both players and venue owners while incorporating tournament organization features.
